

Dear Committee Member,

I understand that you are now in the process of formalizing Illinois redistricting maps.

As a resident of Congressional IL 03 , I wanted to take a moment to express my concern and I want to insure that my voice and the voices of my family and neighbors can can still be heard in this district.

I am concerned that the redrawing of these maps for IL03 would silence our ability to be a part of what has historically been a diverse and multi ethnic community and the ability of us to have a say in how this region has always impacted our economic community in terms of jobs, infrastructure and quality of life for all the residents in this area.

I have seen the changes that have occurred in my district and I want to guarantee that the IL03 area also has the Chicagoland portion included since it impacts not only the residents there but also the residents where I currently live.

I would like you to maintain the general shape of this district as it stands now so that we have a good representation of all the families and residents in this IL 03 area.

Sincerely,
Sarah Zavala, PharmD
